**3.27 Institutional Social Responsibility:** The National Service Scheme is a students' empowerment programme through campus community interaction. Two units are vibrant and active. The N.S.S. volunteers have been working for the upliftment of the village community. They have identified the needs and problems of the villagers of Kamancha, Nrayanpur, Old Malda Block. They also tried to invent ways to solve the problems of the people residing there. In this way, they have developed a sense of social and civic responsibilities. They have gained skills in mobilizing community participation. They have organized special camp and rallies to make aware about health related issues. They have placed community interest before individual interest. Programme officers have encouraged the volunteers to participate in the N.S.S activities through corporate living and cooperative action. Through these activities, the institution has tried to perform its social responsibilities at its best.

**ANNEXURE:1 ALUMNI ASSOCIATION**

The Institution maintains the record of the Alumni Association. The number of the alumnus is 688. As one of the Stakeholders of our Institution, the Alumni Association provides important feedback on development plan of the College. Among the programmes undertaken by the Association, the most noteworthy is the financial support to the poor and meritorious students of the College to clear their University Examination fees. Their suggestions on various academic and extra-curricular activities of our institution are found to be of immense help for the college administration since those suggestions arise from their long experience regarding the functioning of the institution.They help to organize N.S.S.activities,cultural programme and annual exhibition. Dr.Anil Das, member of Gour Mahavidyalaya Alumni Association, delivered a lecture on “Bio-Chemic system of Medicine” on 13 .5.2018 under the supervision of the IQAC.

**ITEM1.4.1: Annexure-4**

### BEST PRACTICE: ANNEXURE-I

Quality education is impossible without innovative technology because traditional methods are cumbersome and slow and the new generation requires high speed and wants to go beyond imagination that can be achieved only through latest technology. The College has partly adopted ICT enabled e- governance. Principal's room, office, each department and the Library have computers fitted with printers. The entire network of the Office has been connected to a single server under a master administrative control. The College Office and the Department of Computer science have been interconnected by LAN. Many records are maintained in an electronic format. Electronic products, software and accessories are bought for the up gradation of the existing technological infrastructure. The College has installed different software for on line admission, salary and P.F. transfer, maintenance of accounts, collection of fees and other activities like E- tender. The College has provided photocopier machine and LCD projectors. The Institution has provided at least one computer with internet connection to each department and also to the office staff. LIBSYS is being used for Library automation. INFLIBNET, E- books from Taylor and Franchise group and JSTOR are available. Faculty members, members of the non- teaching staff and students can access the internet facility.

### BEST PRACTICE: ANNEXURE-II

Our environmental ethics is to make the College campus more sustainable and eco- friendly. A Green campus is a place where environmental friendly practices and education combine to promote sustainable and eco- friendly practices in the campus. Green campus is holistic aiming to make environmental awareness and to act as an intrinsic part of the life and ethos of the Institute. Green campus endeavours to extend learning beyond the class room to develop responsible attitudes and commitment both at home, village and college campus or in the wider community. Many Gardens have been developed:(1). Flower Garden(No.1):372"-922".(2). Flower Garden(No.2):511"-517".(3). Flower Garden(No.3):508"-119".(4). Flower Garden(No.4):385"-415".(5). Flower Garden(No.5):237"-294".(6). Garden of Medicinal plants:669"-116".(7). Garden of Medicinal plants(No.2):610"-1189".(8). EX-situ conservation garden(NO.1).(9). Herbarium(NO.1)(10).

Arboretum( NO.1)(11). Garden on the bank of the college pond. Rain water harvesting plant and Solar power energy plant have been established.

There is a pressing need to accelerate the development of advanced clean energy technologies in order to address the global challenges of energy security, climate change and sustainable development. In today's scenario solar power is one of the best solution to overcome the energy deficit in the World. The generation of solar power does not have any adverse effect on the environment. The plant provides substantial cost savings on the power consumption for the college. One of the biggest challenges of the 21<sup>st</sup> century is to overcome the growing water shortage. Rainwater harvesting has thus regained its importance as a valuable alternative or supplementary water resource. Green campus initiative helps to create environmental awareness. Students and teachers have shown responsible attitudes and commitment to the environmental enrichment.
