Since Durkheim, whether early sociologist August Comte's theory to explain how societies change and evolve over time, Durkheim believed that society is a complex system of interrelated and interdependent parts that work together to maintain stability (Durkheim 1902), and that society is held together by shared values, traditions, and norms. He believed that to study society, a sociologist must look beyond individuals to social facts such as laws, norms, values, religious beliefs, customs, traditions, and rituals, which all serve to govern social life. Alfred Radcliffe Brown (1951) also defined the **function** of any recurrent activity as the part it played in social life as a whole, and therefore the contribution it makes to social stability and continuity (Radcliffe Brown 1952). In a society, society, it was seen as essential to maintain stability, or what called **dynamic equilibrium** by other sociologists such as Parsons (1951).

Durkheim believed that institutions may make up society, but in order to study society, sociologists have to look beyond individuals to social facts. **Social facts** are the laws, norms, values, religious beliefs, customs, traditions, rituals, and all of the cultural rules that govern social life (Durkheim 1902).

1993). Each of these social facts serves one or more functions within a society. For example, one function of a society's laws may be to protect society from violence, while another is to punish criminal behavior, while another is to preserve public health.

Another noted structural functionalist, Robert Merton (1910–2003), pointed out that social processes often have many functions. **Manifest functions** are the consequences of a social process that are sought or anticipated, while **latent functions** are the unsought consequences of a social process. A manifest function of college education, for example, includes gaining knowledge, preparing for a career, and finding a good job that utilizes that education. Latent functions of your college years include meeting new people, participating in extracurricular activities, or even finding a spouse or partner. Another latent function of education is creating a hierarchy of employment based on the level of education obtained. Latent functions can be beneficial, neutral, or harmful. Social processes that have undesirable consequences for the operation of society are called **dysfunctions**. In education, examples of dysfunction include getting bad grades, truancy, dropping out, not graduating, and not finding suitable employment.
