This is to certify that the documents provided by the Department of Zoology regarding their Mentor-Mentee program have been reviewed and are true to the best of my knowledge.

The Department has implemented a robust Mentor-Mentee program to support and guide students throughout their academic journey. Under this program, each student is assigned a faculty mentor who provides academic and career guidance, helps develop research skills, and assists with any personal or professional challenges.

Meeting No. -

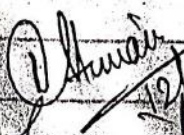

Mentor - Mentee Distribution (Students' Monitoring System)

An extract of the proceeding of the meeting conducted by Academic Committee of the Department of Zoology, Gour Mahavidyalaya, Mangalbari, Malda, held on 12th September, 2022 at 12 PM in Departmental Teachers' Room. The resolved outcome is below -

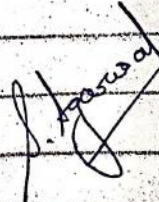

1. All the faculty members should use IET for delivering lecture as far as possible.
2. There will be five group of students guided by five teachers from the first semester and each group will be formed in the manner of equal representative. The students of each group will be classified on the basis of marks obtained in the class test, attendance etc. under respective teacher.
3. Study material should given to the students.

Report on Student Concerns and Faculty Interventions (Mentor-Mentee)

Introduction

During recent discussions among departmental faculties, it was noted that a considerable number of first and second-semester students were facing confusion regarding continuing their current course or opting for a professional course. Additionally, a significant portion of students displayed apathy towards reading books, preferring internet-based notes, and showed less interest in departmental or extracurricular activities.

Faculty Intervention

In response to these concerns, we the faculty members engaged in individual and collective discussions with students to address the identified issues. These interactions aimed to provide guidance, support, and encouragement to help students navigate their academic and career choices effectively.

We the departmental faculties of Zoology addressed the issue of students being less interested in departmental activities through some interventions:

Organizing interactive sessions with students from all semesters to discover their hobbies and interests. Furthermore, we attempted to enhance student participation in departmental events through their hobbies. By providing opportunities for students to actively participate, their interest and involvement in extracurricular activities increased.

Providing guidance and counseling sessions to help students understand the benefits of engaging in departmental activities. These sessions aim to motivate students and demonstrate how active participation can enhance their overall educational experience and personal development.

Outcomes

The ongoing efforts and interventions by faculty members have started yielding positive results. Some notable improvements include an increase in students visiting libraries, demonstrating a renewed interest in reading books, and actively participating in departmental activities. These positive changes indicate a shift towards a more engaged and proactive student body.

Conclusion

By actively engaging with students and addressing their concerns, the departmental faculties have played a crucial role in fostering a more supportive and conducive learning environment. Continued collaboration and communication between faculty and students are essential to sustain these positive developments and further enhance the overall academic experience for all stakeholders.
