About the College:

Gour Mahavidyalaya, situated on the north side of Mahananda River where N.H.34 passes through Mangalbari, Old Malda, started its journey on the 5th day of September 1985 to cater to the needs of the people, mainly of the district, as well as those of this locality. In the field of higher education. Gour Mahavidyalaya, a premier institution for the higher education of the Old Malda reserve constituency, has been trying to continue to free people from ignorance, superstition, bad habits and many wrong ideas on the one hand and provides the people of this locality with some skills.

About the department:

The department of Geography started its journey from the session 2001-2002 with a meagre amount of 20 general stream students to cater to the educational needs of the weaker sections of this Block and to other parts of the districts in general under North Bengal University. At present both honours and general courses are running with three sanctioned full-time teaching posts and three SACT posts who are continuously guiding their students for their all-round development. The department publish wall magazine annually. Eco-club organize various activities on environment and social awareness regularly. Student seminars are organized annually for enhancing skills of the students. Besides, seminars, special lectures, career counseling programmes, short-term field visit, in-house hands-on training, short-term course are also arranged for the benefit of students.

About the Course and desired outcome:

Nowadays online learning materials become very much essential and effective too for both students and educators. A variety of online platforms have emerged now for making the teaching-learning process more effective and flexible. Both students and teachers are consulting these learning modules for effective learning and teaching. Online materials in the form of text, audio-visual and multimedia or any other form are becoming more and more popular nowadays. These online materials make it possible to access the global academia with expertise in their fields which is also a prime goal of the new economic policy 2021. Various national and international institutions across the globe are now preparing excellent quality online teaching-learning modules for both the students and teachers globally. In India also most of the higher educational institutions and universities including the IITs and University Grants Commission are now at the forefront for preparing good quality teaching materials to be accessible online for every student and teacher in India. In this tough time of a year-long shutdown of the higher educational institutions, these online contents become the key to acquiring the desired knowledge and enabling the process of teaching-learning running at home.

Thus, the primary goal of this course is to make people aware of the ocean of e-contents available right now and the background of preparation of those online contents so that they can take part in these initiatives too.

Brief outline of the

Course:

Nature and types of e-contents and how to access those e-contents and Importance and relevance of such e-contents for students and teachers
Sources of E-content (NDL, EPG Pathshala, Vidyamitra, E-shodhsindhu, Shodhganga, NPTEL, YouTube, Websites, Blogs etc.)
Contribution of students for the development of e-contents and future scope.
Use of mobile and PC for e-content development through various platforms including social media platforms etc.
Developing e-content with open-source vector-based animation software
Online demonstration of MS PowerPoint, YouTube, Google workspaces for e-content development.
Basic video editing in mobile and PC for video content development
Content management through PC/ Mobile
Scope of financial benefit from these activities.

Course

Schedule: (21)

class 1- Concepts of E-content, types and mode of access, importance and relevance of those online contents for students and teachers.

Class 2- E-content management: NDL, E-PG Pathshala, E-shodhsindhu, Vidyamitra, NPTEL, Shodhganga

Day 2: (11/11/21)

Class 3- File management through PC/ Mobile

Class 4- E-content management: Websites and Blogs, Facebook, Academia, LinkedIn, SlideShare, Quora etc.

Day 3: (12/11/21)

Class 5- E-content management: Google workspace (Drive, classroom, g-suite website), YouTube

Class 6- Developing e-content with open-source vector-based animation software (Synfig studio)

Day 4 (13/11/21)

Class 7- Demonstration of Google workspaces (Drive, Doc, website)

Class 8- Demonstration of MS PowerPoint

Day 5 (15/11/21)

Class 9- Basic video editing through mobile

Class 10- Basic video editing through PC

Day 6 (16/11/21)

Class 11- Demonstration of YouTube channel (Part-1)

Class 12- Demonstration of YouTube channel (Part-2)

Online evaluation (MCQ+ Demonstration video)

Feedback collection

Issuance of certificate

***** E-Certificate will only be provided after successful completion of the course**

Add-On Course (30 Hours)

Summary report

The Skill Enhancement Course on E-Content Development is a crucial initiative that responds to the rapidly changing landscape of education, particularly in the wake of the COVID-19 pandemic. As educational institutions around the world faced unprecedented challenges, the need for high-quality, accessible online learning materials became more apparent than ever. This course addresses this critical need by equipping educators, students, and content creators with the necessary skills and knowledge to develop and utilize e-content effectively.

One of the most significant outcomes of this course is its contribution to the democratization of education. By fostering the ability to create and distribute e-content, the course empowers participants to reach a broader audience, breaking down traditional barriers to education such as geography, financial constraints, and access to physical resources. This aligns with the global trend towards open educational resources (OERs) and supports the goals of India's New Economic Policy 2021, which emphasizes the importance of leveraging technology for inclusive and equitable education.

Moreover, the course recognizes the diverse forms of e-content—ranging from text to multimedia—and the importance of tailoring these materials to meet the varied needs of learners. This flexibility ensures that e-content can cater to different learning styles and preferences, making education more personalized and effective. As online platforms continue to evolve, the skills learned in this course will enable participants to stay at the forefront of educational innovation, contributing to the creation of dynamic and engaging learning experiences.

The emphasis on the preparation and quality of e-content is also crucial. High-quality e-content not only enhances the learning experience but also ensures that educational materials remain relevant, accurate, and aligned with current academic standards. By understanding the process behind e-content development, participants can contribute to creating materials that are not only informative but also pedagogically sound and culturally sensitive.

In conclusion, the Skill Enhancement Course on E-Content Development is a forward-looking program that equips individuals with the tools to navigate and contribute to the digital learning ecosystem. It reflects the ongoing shift towards a more interconnected and technologically driven educational environment. By fostering the skills to develop and use e-content, the course not only enhances the teaching-learning process but also plays a pivotal role in shaping the future of education, making it more accessible, adaptable, and inclusive for all.
