Doyel Roy.

30.11.2024.

## About Mahananda River

Malda town is located on the banks of the Mahananda River. The Mahananda River flows through the Malda district of West Bengal, India. The river's flow through the district has influenced the region's history and economy. However, since the past decade, the water quality had been degrading severely due to the high percentage of pollutants & industrial wastes found in the waters.

Mahananda River

**Our motive:** Thousands of years back people realized how important a river was for a civilization to flourish & thus they took great care of it. However as mankind progressed, unfortunately, we started forgetting the importance of keeping our drinking water resources free from pollutants of the world. Thus, members of Botany Department got together to clean Mahananda riverbank as it is main source of water in

Malda town.

## Group-work carried out by our students

## Students' Attendance

ATTENDANCE SHEET  
Community Service (Date: 05.12.24)  
Department of Botany, Gour Mahavidyalaya

Students Name	Semester	Signature
